

ASMARA COLLEGE OF HEALTH SCIENCES

SCHOOL OF PUBLIC HEALTH

JULY 27, 2026

Dear Madam or Sir

It is my pleasure to recommend Ms. Feven Beletse Negash for CIP Fellowship program 2026. I have known Ms. Beletse in two capacities: as her academic supervisor during her undergraduate studies in Public Health at Asmara College of Health Sciences, and later as the moderator of her session at the International Conference of Eritrean Studies (ICES), held at Asmara Palace, Eritrea, where she presented her undergraduate research.

During her college years, Ms. Beletse distinguished herself as a disciplined and intellectually curious student. She consistently sought out opportunities to apply classroom learning to real community health problems, and she went on to found and lead a research team which are interested to eye examination barriers in Sub Saharan African Countries. Her work reflect both technical rigor and a genuine commitment to improving outcomes for underserved populations.

At the ICES conference, I had the opportunity to moderate the session in which Ms. Beletse presented her paper on the prevalence of diarrhea among under-five children in Sub-Saharan Africa. She presented her findings with clarity and confidence, and handled questions from the audience thoughtfully, demonstrating a sound grasp of both her methodology and its public health implications. Her ability to communicate complex epidemiological findings to a mixed academic and policy audience was a notable strength, and one that will serve her well in graduate-level research.

Beyond her research, Ms. Beletse has shown consistent leadership in community health. She has served as an advocate for promotion of the Washington group questions that helped our campus to identify students with disabilities, she has worked for her last three years during her undergraduate as a representative student for ensuring access to assistive academic accommodation.

I recommend Ms. Beletse without reservation. She combines basic analytical ability with genuine commitment to inclusive policy for disabled community and public health equity, and I am confident she will continue to make meaningful contributions to the program. Please feel free to contact me directly if I can provide any further information.

Yours sincerely,

Zerabruk Tesfamariam, Ph.D.
